

# Learning About Careers

**Learning about Careers** provides 32 standards-based lessons in 16 career clusters. These short lessons of 6-8 pages each are easy for instructors to implement and motivating for students.

By assuming the role of an employee in each targeted career, students tackle typical tasks found in a day's work. **Learning about Careers** is ideal for courses such as Career Discovery, Career Exploration, Transition, or any class that can profit from blended academics and work readiness.

Each lesson includes:

- A career overview in which students identify the skills, knowledge, and characteristics required to achieve success
- Typical academic, customer service, and other tasks an employee might perform on the job (applied academics skills)
- A personal budget exercise based on expected career earnings in that field
- Additional resources for further exploration

Students will be able to make preliminary decisions about careers while improving their work readiness and academic skills.

**Learning About Careers** is available in reproducible PDF format on CD. Price: \$349.
